

BRUNO BARBOSA AMORIM PARGA

brunoparga @ [gmail, gitlab, github, linkedin]

Programming teacher at Le Wagon

I have taught Ruby, SQL, HTML, CSS, JavaScript and Rails to over 120 students at eight Le Wagon bootcamp batches in São Paulo (where I'd studied), Rio de Janeiro and Buenos Aires.

Programming Background

My portfolio can be found at www.brunoparga.net.

I have also learned these skills from online courses, tinkering and documentation:

- ◆ Test-Driven Functional Program Design
- ◆ Deep Learning with Python
- ◆ Elixir/Phoenix/Erlang-OTP
- ◆ Node.js/Express/TypeScript
- ◆ MySQL/PostgreSQL/MongoDB
- ◆ RESTful and GraphQL APIs
- ◆ React/Redux
- ◆ basic Vue.js and Angular

Formal Education

BA in History – *University of São Paulo*, 2007

Diplomat's Training Course – *Instituto Rio Branco*, 2012

Diplomat

In 2010-12 was a diplomat for the Brazilian Foreign Ministry. I handled our relations with South Asia; I also tallied how many Brazilians lived in each country and strengthened links with Brazilian Citizen Councils.

Translator

I translated for Brazil the book *Montessori, Dewey and Capitalism*, by Jerry Kirkpatrick, to be published by Bunker Editorial. I have also freelanced as a commercial translator for agencies in the USA and China.

Field Associate

I was a Field Associate at Americans for Prosperity Foundation in 2016. I recruited volunteers for AFP-F and knocked on thousands of doors in New Hampshire, making even more advocacy phone calls all over America.

Volunteer work

I have taught History and Chemistry for a year in a free pre-university course in an underprivileged Brazilian community. I have also volunteered with pro-freedom organizations such as Students for Liberty. More recently, I have worked for rationality and effective altruism (EA) causes like the EA Global conference in Boston.
